

## *El Formosa - Taiwan Scenery Project Part 8*

## 1. Introduction

---

Fengnin Airport (aka Taitung Airport, RCFN), is located in the southeast of Taiwan. Being known as the last pure land in Taiwan, Taitung County has lots of precious nature and cultural resources. With Green Island (Part7) and Lanyu Island (Part5), this area has become one of the most important tourist attractions in Taiwan. In order to hold more traffic and provide better service, Fengnin Airport also experiences lots of change during these years. With Gmax technology, we are proud to introduce this highly detailed airport and hope you find great pleasure in flying this county. Require El Formosa Part1, 3, 6, and 7.

## 2. Features

---

1. For FS2004 Only.
2. Whole new GMAX Fengnin Airport (RCFN), including all terminals, radar station, police office building, maintenance and helicopter hangers, gas station, nav aids, signs, parking lots, accurate AFCAD, night lights and more. All based on real situation and layout.
3. Add significant landmarks including Formosan Naruwan Hotel, Sunny Bridge, Taitung Bridge, Chunghwa Telecom Building, Cathalife Building, and Taitung Incinerator.
4. Add major VTP roads and river into Taitung City.
5. Modify instrument approach procedure (AP\*\*\*\* file), now IFR AI aircrafts follow MLS approach procedure. MLS is simulated as LDA in AFCAD, and frequency is 110.9 MHz.
6. Move Chihhong AB(RCQS) to correct position.(AFCAD and basic flatten only)

## 3. Installation

---

1. Before installation, please make sure you have correctly installed Taiwan Scenery **Part1, Part3, Part6 and Part7** previously. This scenery does NOT compatible with default ones. Please download them from AVSIM.
2. There are four folders in the zip file. Put these folders to any place you like. Copy and paste the file in the “Replacement” folder into FS9/scenery/asia/scenery folder. Be sure to backup those files first. Then put the files in the “Effect” folder into FS9/effect folder.
3. An optional AFCAD file AF2\_RCKH.bgl is added in the zip file. If your RCKH AFCAD has runway 09R removed and 09L modified to 09, this update is not necessary. Otherwise you can consider updating this file. Only ATC instrument approach procedure on RCKH will be affected if you DO NOT update this file.
4. Install RCFN and RCQS in normal procedure:
  - a. Unzip RCFN and RCQS folders to where you usually install your scenery.
  - b. Add these folders to scenery library in FS scenery setting.
  - c. Restart FS9
5. DONE!!

## 4. Tour Guide

---

Fengnin Airport (RCFN) serves as a domestic airport in Taiwan. There are three major routes connecting Taipei (RCSS), Green Island (RCGI, [El Formosa Part7](#)) and Lanyu (RCLY, [El Formosa Part5](#)). Airlines use jet planes for Taipei route and Do228 for island routes. You could download our previous scenery and fly those routes by yourself. Charts can be found on <http://www.vatroc.org/chinese/charts/taipei.html>

## 5. Credits

---

Special thanks to Mr. Fu's pictures and <http://www.flyways.info> for their apron light effects.

## 6. Legal

---

This scenery is a freeware for all Flight Simmers. We do not give our permission to anybody to sell this package or any part thereof or to upload it to any other server, including that charges for downloads or to include it on any media that is sold.

We will NOT take any responsibility for potential damage or loss to any user's computer or other property as a result of the usage of this scenery.
